## THE AMBER OAKS DIFFERENCE

4/27/2020

### PASTURED CHICKEN

- ORGANIC FEED
- NO ANTIBIOTICS
- NO HORMONES

In addition to organic feed, our chickens hunt, peck, scratch and eat freely day and night from a salad-bar of grasses, legumes, and insects. Our flocks are moved to clean pasture daily and fed organic grain.

Welcome to chicken the way it is supposed to taste.

### FARM FRESH EGGS

- FREE RANGE
- ALL NATURAL
- NO HORMONES

All chickens are free range and truly pastured! Flocks are allowed access to the entire ranch from dawn until dusk daily and are supplemented with non-GMA grain.

### PASTURED PORK

- HUMANELY RAISED
- NO ANTIBIOTICS
- NO HORMONES

Our pigs live continuously on chemical and pesticide free pasture rooting for forage.

They have access to shade, shelter and wallows as well as vegetation. They enjoy a healthy and stimulating environment year round.

### GRASS FED BEEF

- GRASS FINISHED
- NO HORMONES
- NO ANTIBIOTICS

Our cows are born here on the ranch and are rotated through pesticide and chemical-free grassy pastures every day.

Our calves eat only grasses and legumes and receive no drugs whatsoever (*antibiotics, vaccines, wormers, etc.*) thus ensuring you receive the most natural, healthy meat possible.
